~~expectation since the announcement of the reopening of the country's~~
borders between tour operators and airlines, and every week the
scenario is more favorable.

In that sense, he pointed out that there are requests from Canada and the United States, also from the United Kingdom and other European countries, also from Mexico, Panama and the Dominican Republic.

Russia maintains the operation and plans growth for the winter season and travel from different cities in that country to Cuba has been authorized, said García Granda.

Among the good news, he mentioned that in international airports the customer will have access to the Wi-Fi network for free for 30 minutes and online payment facilities will be enhanced.

He stressed that they have worked on the design of new products, including those related to well-being and quality of life; In addition, work is being done to make it possible to offer national vaccines to those who visit the country.

Regarding national tourism, it was reported that the Varadero tourist hub will open its doors for this market segment as of Monday, October 25, and the marketing of all the facilities open to date is authorized, including those that operate today for the international market. .

As of November 15, he said, nationals will be able to fully enjoy the country's tourist offer.
